

INTRODUCING SUPERKEY: MULTI-FUNCTION SERVICE TOOL FOR GOLF ROTOR MAINTENANCE

LAKE FOREST, CA

SuperKey, a versatile all-in-one golf rotor service tool, is now available from Underhill International for use with Rain Bird and Toro sprinklers.

Described as “the Swiss Army knife” of golf maintenance, SuperKey facilitates servicing of electric valve-in-head rotors, which account for 90 percent of heads on a typical course.

SuperKey measures approximately 12 inches tall and is offered in two models: A-GKRB for Rain Bird rotors and A-GKT for Toro rotors.

Depending on the model, SuperKey features a range of functions, including:

1) manual on/off sprinkler control; 2) on/off control assembly removal; 3) debris removal from rotor's on/off control; 4) bottom valve snap ring and rotor assembly snap ring removal; 6) solenoid plunger removal; and 7) pilot valve (regulator) removal. The device also has an on/off control pointer.

SuperKey is constructed from aircraft-grade stainless steel and high-strength composite for long-lasting durability.

For more information on SuperKey, visit the Underhill website at www.underhill.us or call 866.863.3744.

Underhill offers an expanding line of turf care products for golf courses, including FCI Profile™ solid metal nozzles for efficient water distribution; LiquidPro™ wetting agent applicator; Magnum™ and Precision™ hose end nozzles; and Tracker™ portable irrigation. The company is headquartered in Lake Forest, CA, and has been in business for more than 30 years.
