

**UNDERHILL'S NEW FCIPROFILE STAINLESS STEEL RETROFIT NOZZLES DESIGNED  
TO ELIMINATE DONUTS, PROBLEM WET/DRY SPOTS**

ALISO VIEJO, CA

Underhill has expanded its line of stainless steel retrofit rotor nozzles, which are designed to eliminate donuts, patchy dry spots and over-watered areas typically associated with time-worn plastic nozzles.

The Underhill **FCIPROFILE** (Full Coverage Irrigation) product line now includes full metal nozzles for the Rain Bird Eagle 700 and other popular Rain Bird and Toro golf sprinklers.

As part of the **FCIPROFILE** product introduction, Underhill is offering a free pair of Underhill Nastek stress-detection glasses with the first order of a case of 24 **FCIPROFILE** nozzle sets. The NASA-developed Nastek glasses enable superintendents to identify dry spots and other turf stress areas before they are visible to the naked eye.

All Underhill **FCIPROFILE** nozzles are backed with a 100% satisfaction guarantee and are color-coded for easy field identification.

**FCIPROFILE** housings are constructed from solid brass and feature stainless steel nozzles. They are engineered to provide uniform irrigation distribution and reduce wind drift. Additionally, **FCIPROFILE** full metal nozzles will not erode, ensuring consistent, uniform performance year after year.

The Underhill **FCIPROFILE** nozzle line has undergone extensive laboratory testing at the **Center for Irrigation Technology** at California State University, Fresno. Study results are available on line at [www.underhill.us](http://www.underhill.us).

The **CIT** data includes details on irrigation uniformity testing and information on water and energy savings, indicating that Underhill **FCIPROFILE** nozzle retrofits can pay for themselves within two years.

**FCIPROFILE** nozzles have been installed on prominent golf courses nationwide and superintendents' comments about **FCIPROFILE** performance can also be seen online at the company Website: [www.underhill.us](http://www.underhill.us)

Underhill has an expanding line of golf course and sports turf irrigation products, including **PelletPro** wetting agent applicator, **Magnum** and **Precision** hose nozzles, traveling **Tracker** portable irrigation, **Mirage** super-sized sports turf sprinklers, two-wire control systems and more.

For more information about Underhill **FCIPROFILE** Nozzles, call Underhill toll free at 866-863-3744 or see the **FCIPROFILE** Nozzles online at [www.underhill.us](http://www.underhill.us).

The company is headquartered in Aliso Viejo, CA, and has been in business for more than 25 years.
